## VOLUNTEERING INVOLVEMENT

### 42 Entrepreneurs :

- Writing a monthly newsletter (+2400 subscribers).
- Organizing events: Startup Pizza Nights, [hackathons](#), talks.
- Developing financial partnerships.
- Creation of a [podcast](#) (entrepreneurs interviews)

After completing a Masters degree at Sciences Po Bordeaux and a two-year experience in the banking industry, passionate about new technologies, I've studied at 42. My recent professional experiences confirmed my wish to continue in this direction as a software engineer.

## WORK EXPERIENCE

### Jitter | June 2021 - December 2021 - Paris Software Engineer - Internship

Jitter is an easy-to-use animation tool on the web.

- Tool improvement: add new media type supports (gif, audio, video), "loop", "hide", "renaming" options, timeline and font choices optimization.
- Optimization of user account features (invoices downloadings, card payments updates, modify or suppress data).
- Creation of a tracking tool (AWS CloudWatch).
- Automation of the company dashboard (Stripe, AWS).
- Customer support (Intercom).

Languages : Javascript, React, TypeScript, NodeJS, Canvas.

### Natixis - Digital Factory | March 2020 - September 2020 - Vincennes Software Engineer - Internship

The Natbot team of the Digital Factory aims at conceiving and internally marketing chatbots. The team created the Natbot platform, allowing all Natixis employees to make their own chatbots with no code.

- Enrich existing chatbots (internal and external APIs).
- Suggest new use cases (for example: automate meeting room booking based on availability).

Languages: Java, Groovy.

### BNP Paribas Banque Privée | Janvier 2017 - Novembre 2019 - Pantin Private Banker advisor (before professional retraining)

Management and development of a customer portfolio. Personalised service on financial management and on a patrimonial side.

## EDUCATION

### 42 | 2019 - Today IT Architecture Expert

- Algorithmic projects: specialization in optimizing data processing (graph theory, sorting algorithms).
- Web projects: specialization in web technologies. Project examples:
  - [Music Room](#) : mobile application to have a different experience of music.
  - [Matcha](#) : dating web application.

Used languages : Javascript, React, NodeJS, Canvas.

### Sciences Po Bordeaux | 2011 - 2016 Business Management Master's Degree

Double degree in partnership with [Institut d'Administration des Entreprises](#) of Bordeaux.  
Subjects : financial analysis, corporate finance, management control, general knowledge.
